

WILLOW GLEN FARM

Information for US Buyers

ALL PRICES IN CANADIAN DOLLARS

We do not sell to the southern states, the adjustment from our climate is too hard on the cattle. These states include AL, AZ, FL, GA, LA, MS, NM, SC, TX and southern CA.

All payments must be made in Canadian funds. This can be via wire transfer, a CAD draft or credit card (subject to a 2.9% convenience fee).

We will look after all export paperwork, including any state permits. \$150 will be added to the final purchase price of each animal. This charge covers all costs to meet USDA import requirements and the brand inspection. To help with budgeting, the costs of additional testing (that may be required by individual states) are:

TB: \$160

Trichomoniasis: \$140

Brucellosis: \$170

If your state requires brucellosis vaccination, the cattle may be subject to some variation of quarantine until you can vaccinate them. As Canada is considered brucellosis free, it is illegal to vaccinate for it here.

Please ensure your state does not require a CAN brand.

If you are not picking up the cattle yourself, we require the services of a broker to cross the border. Brokerage fees will be \$210 per animal, this includes the border inspection fee.

If you are picking up yourself, you will need to make an appointment with the border vet ahead of time. We require at least tens days notice to get the CFIA paperwork completed. Longer, if you require additional health testing. Keep in mind that the paperwork is only good for 30 days from the day the vet inspects the cattle. You may also want to check with US Customs to see if there are special requirements with them specifically. Some of our clients have been able to cross personally, without issue. Others were told they needed to cross commercially.

Please note that we will require your mailing address, physical address, phone number and email for the export paperwork. If we need to use a broker, we will need either your SSN or an EIN (with business name).

You are responsible for all costs and risks associated with transportation. We are happy to work with a custom hauler of your choice. Or we *MAY* be able to provide delivery (or a portion thereof). Please contact us to discuss ahead of time. We charge \$1.85/loaded kilometre. If we can combine delivery with other purchasers along the route, we will divvy up that cost amongst everyone. We encourage buyers to insure their purchases.

Once the animals have safely crossed the border, we will transfer the animal into your name with the CHCS. We will send you those papers, an extended pedigree and their DNA case with markers. You can then register the animals as an import with the AHCA.
